WORK EXPERIENCE

- **Software Developer**

- **KNOWIS AG**

- April 2022- Present

Regensburg, Germany

Development and maintenance of credit management solutions offered to multiple financial institutions. My role is to design and maintain the frontend template which reduces the cost, time and provides transparency to all the stakeholders.

- **Design Engineer**

- **SEAGATE TECHNOLOGY**

- January 2016-February 2018

Bangalore, India

Associated with the SSD development department. My responsibilities included : Design, development and maintenance of the web applications. Front end development with JavaScript, HTML5, CSS. Building an internal web portal for tracking and tracing different components of SSD. Modifying source code to enhance stability and to fix defects.

- **Full Stack Developer**

- **FREELANCE**

March 2018-March 2022

- Fin-tech Project- Company based out of the USA developing banking authentication software. My role involved building authentication and authorization mechanisms via OAuth and implementing Redis for caching to enhance performance. Tools and technologies used: Node.js, Express.js, JavaScript, MySQL, Redis, OAuth, Postman, Git (GitHub), Linux. Successfully reduced authentication response times by 40% and improved overall system reliability. Conducted thorough API testing with Postman to ensure robustness and security compliance.
- E-commerce Project- Company based out of the USA having multiple brand apparel products. My primary role was to design and develop admin dashboards using PHP Laravel to optimize inventory management. This included implementing advanced in-memory search functionality to enhance efficiency and leveraging Laravel's Eloquent ORM for data handling. Tools and technologies used: PHP, Laravel, JavaScript, MySQL, CSS3 Flexbox, Git.

- **Freelance**

- **PERSONAL PROJECTS**

March 2018-March 2022

- Smart-Brain : A face recognition app using an Artificial Intelligence API (<https://github.com/inolas05/Smartbrain>).
- Robo-Friends : A real time search app that fetches data from 2 different APIs (<https://github.com/inolas05/Robofriends-App>).
